SUMMARY

Backend Software Engineer with 2+ years of experience building and optimizing production APIs and backend systems using **C#, .NET Core, Python, and SQL**. Experienced in **API architecture, concurrency, database optimization, and performance engineering**, with hands-on experience reducing API latency, improving database performance, and resolving production issues. Strong foundation in **Data Structures & Algorithms, system design, and backend engineering**, with additional experience building **LLM-based tools and AI agents**.

TECHNICAL SKILLS

Languages: C#, Python, SQL, JavaScript, C++

Backend: .NET Core, ASP.NET Core Web API, REST APIs, Entity Framework Core, LINQ, Async/Await, Node.js

Databases: SQL Server, PostgreSQL, MongoDB, Vector Databases

Systems & Engineering: System Design, Distributed Systems, Concurrency, Database Optimization, Caching, API Security, Performance Engineering

AI & Tools: Claude Code, Codex, MCP, AI Agents, Git, GitHub, Docker, Azure, IIS, Postman

EXPERIENCE

Software Engineer

Jan 2025 – Present

Mindfire Solutions Digital LLP, Bhubaneswar

- Owned the design and delivery of 50+ RESTful APIs using C#, .NET Core, and SQL Server, applying modular architecture and reusable components to reduce new feature turnaround time to 2 days.
- Optimized multithreaded and asynchronous workflows for concurrent production workloads, reducing API response times from 800ms to 260ms through improved request processing and backend execution.
- Optimized SQL queries, stored procedures, and indexing strategies to reduce database contention and maintain consistent performance under concurrent read/write workloads.
- Implemented JWT authentication and RBAC across 10+ backend modules, resolving 40+ production defects and reducing recurring release issues by 30% through improved API design and engineering practices.

PROJECTS

Asset Management System | .NET Core, C#, React.js, SQL Server, IIS

- Built and deployed a backend-driven asset management platform using .NET Core Web API and SQL Server, supporting 5,000+ assets across 15+ API endpoints.
- Redesigned database schema and optimized indexes and query execution, reducing asset search latency from 600ms to 150ms.
- Implemented JWT authentication and RBAC across 3 user roles and deployed production APIs on IIS with secure access controls.

MX Card Agent | Python, LLMs, MCP, AI Agents, Rich TUI

- Built a local-first AI agent using Python, LLMs, and MCP capable of executing multi-step workflows through tool calling, filesystem operations, shell execution, and web search.
- Designed context management with automatic compression, loop detection, persistent memory, approval workflows, and safety policies for reliable autonomous task execution.
- Packaged the application as a single Windows executable with secure API key storage, installer support, and PATH integration for simplified deployment.

EDUCATION

Silicon Institute of Technology

B.Tech in Computer Science and Engineering

Bhubaneswar

2021 – 2025

ACHIEVEMENTS

Competitive Programming: 4★ CodeChef, Global Rank 65 in Starters 247, Solved 800+ DSA problems across CodeChef, LeetCode, and GeeksforGeeks

Hackathons: Runner-up at Trithon State-Level Hackathon, Finalist at Smart Odisha National Hackathon

Product Development: Winner of ASCII 2.0 Product Development Competition, Worldwide Rank 1715 in Google Kickstart 2023

Leadership: Mentored 20+ developers in software engineering, .NET Core, React.js, and full-stack development
